## PROJECTS

| | |
|---|---|
| FROM <br> *sep. 2017* <br> TO <br> *jun. 2018* | **React-Native Mobile App/Senior Capstone Project** <br> *Oregon State University* <br><br> Lead a team of two other students to develop a Mobile Application in React-Native, to provide both IOS and Android usability. The App was a year long project to design and code a social networking journaling application. The app allowed user to write posts in a long form way with embedded images as well as follow and explore other journals. The main application used react-native, a framework for javascript, PHP for networking to the database, which was written in SQL and housed on a Firebase server. |
